

Atlas Super Abrasion Resistant

Best belt for Harsh Quarry, Fertiliser and Mining Application

ATLAS 3 and 4 PLY conveyor belt has a SUPER HIGH ABRASION (SAR) resistant rubber compound in its covers making it the toughest belt in New Zealand. ATLAS was designed for the harshest conditions where heavy abrasion is the issue. Typically we see this in Fertiliser, Quarry, Sand and Concrete plants.

Features

- Super abrasion resistant rubber covers (SAR)
- Very good impact resistant
- Ep 160, 200 fabric
- 3 ply and 4 ply
- Specifically manufactured to HCD specification
- Natural rubber heat resistance
- Cut edges
- Manufactured to standard EN ISO 14890
- Sizes mm widths – 450, 600, 750, 900, 1050, 1200
- Sizes above 1200 available as required

Benefits

- Super abrasion resistant rubber covers (SAR) means this belt is designed for the harshest abrasive conditions and is the best SAR Premium belt in New Zealand
- Where impact is an issue, this Rubber compound has excellent Impact resistance qualities
- This specification is HCD and is specific to NZ conditions
- Manufacturing to this standard EN ISO 14890 is critical to ensure quality standards are met
